Economic Review Of
 Immunization Information

Health Economics Review
 | Home page
 ThinkWell completed a
 systematic review on the
 cost of delivering vaccines
 across different low- and
 middle-income countries
 and through a variety of
 vaccine delivery
 strategies. From the
 compiled evidence,
 ThinkWell developed the
 Immunization Delivery
 Cost Catalogue (IDCC) –
 the most comprehensive,
 current, and standardized
 global evidence – and
 companion products to
 help interpret the
 evidence.

Abstract. Context: A
 recent systematic review
 found that use of an
 immunization information
 system (IIS) is an effective
 intervention to increase
 vaccination rates. The

purpose of this review
 was to evaluate costs and
 benefits associated with
 implementing, operating,
 and participating with an
 IIS. The speed of
 technology change has
 had an effect on costs and
 benefits of IIS and is
 considered in this review.
 The Immunization Eco-
 nomics SIG provides a fo-
 rum for an exchange of
 relevant research meth-
 ods and practices, as well
 as disseminate results to
 a broader audience. In ad-
 dition, the SIG will culti-
 vate new researcher inter-
 est in the area of vaccine
 economics, and leverage
 lessons learned from
 other priority health is-
 sues.

Context: A recent system-
 atic review found that use
 of an immunization infor-
 mation system (IIS) is an
 effective intervention to in-
 crease vaccination rates.
 The purpose of this review
 was to evaluate costs and
 benefits associated with
 implementing, operating,
 and participating with an
 IIS. The speed of
 Despite improvements in
 immunization coverage
 during the 1990s, national
 immunization rates for 2
 year olds and older adults
 have not yet reached the
 public health objective of
 90 percent cover-
 age. Although state-level
 rates in Illinois and Michi-

gan are generally equiva-
 lent to the U.S. national
 average, substantial varia-
 tion in coverage rates oc-
 curs between states as
 well as within each state.

Designing and
 implementing an
 immunisation information
 system

Interim findings of the
 Vaccinations and
 Immunisations ...
 One United States
 national health objective
 for 2010 is to have at
 least 95% of U.S. children
 aged <6 years participate
 in fully operational
 population-based
 immunization registries or
 immunization information
 systems (IIS) . To achieve
 this objective the Centers
 for Disease Control and
 Prevention (CDC), through
 its National Immunization
 Program (NIP) awarded
 \$262 million in
 immunization grants from
 1994 to 2002 to develop
 and operate IIS in the 50
 states, the District of
 Columbia, five ...
 While in developing
 countries lack of access to
 vaccination and family
 characteristics such as
 low education, literacy
 and socio-economic status
 make up the majority of
 reasons why children are
 not vaccinated , in

developed countries parents make conscious decisions not to use readily available vaccines. Understanding how to encourage uptake is an important public health aim.

Economic Review of Immunization Information Systems to ...

Immunization is one of these preventive interventions, with a potential to bring economic benefits beyond just health benefits. While vaccines are considered to be a cost-effective public health intervention, implementation has become increasingly challenging. As vaccine costs rise and competing priorities increase, economic evidence is likely

Economics of immunization information systems in the ...

A review of existing literature on immunization financing in 1998 indicated that little information existed to guide donors, ministries of health and finance, and NIP managers in improving management and efficiency of immunization programmes, or to develop more effective strategies for the costing and financing of all aspects of immunization services.

Immunisation saves lives. It protects you, your family and your community. Immunisation helps protect future generations by

eradicating diseases. Many infectious diseases are rare or eradicated now as a result of immunisation programs, but new infectious diseases are appearing around the world. Infographic summarising the impact of vaccines introduced over the last 70 years. Download for presentations.

articles were appraised. However, due to the limited quality and quantity of published economic studies addressing the research question; articles were included in the review providing they contained, as a minimum, some potentially relevant cost or resource use data. A total of 10 articles were included in the health economics review.
