 After examining the wreck, however,  
 scientists discovered that the collision had  
 produced a series of thin gashes as well as  
 brittle fracturing and separation of seams

in the adjacent hull plates, thus allowing water to flood into the Titanic. Later examination of retrieved ship parts—as well as paperwork in the builder’s archives—led to speculation that low-quality steel or weak rivets may have contributed to the sinking.

The ship that would never be sunk, a ship of dreams - becomes a ship of nightmares as it is swallowed beneath the freezing Atlantic Ocean. Hit by a massive iceberg it was as much the arrogance of the ship's owners and operators that caused the tragedy of the Titanic on 14th April 1912. 1,517 people perished that night but there was at least one man who was focussed on saving souls amidst the horror.
